Forecast for Monday 27 Dec 2021

Weather: Dry in early hours, but low cloud onto southern and eastern slopes with patchy drizzle and cloud thickening later in night. A cloudy, rather dull start with rain soon spreading in from the southwest, some heavier bursts likely for a time, before the rain turns light and patchy into the evening.

Chance of cloud free mountain/hill tops above 600m: 10%.

Visibility: Often very poor at height, some cloud down to 300m at times on southern slopes and extensive cloud down to 400m in heavier rain.
